

Volunteers Needed!

Since March, Project C.U.R.E. has been responding domestically to COVID-19, sending out over 400 shipments to frontline healthcare workers. Unfortunately, the need for medical supplies around the world is greater than ever as well. Project C.U.R.E. needs your help preparing medical supplies and PPE for distribution.

We have implemented numerous measures in our facilities to make your experience as safe as possible. We are limiting the number of volunteers in each shift, requiring masks and social distancing, providing sanitizers and wipes throughout the facilities, and continually updating operating procedures as more information becomes available.

We greatly appreciate your previous support of Project C.U.R.E. and look forward to seeing you soon.

If you have any questions or concerns, please contact zachhenry@projectcure.org.
